

HANLON COMPOSITES PATTERN AND MOLD MAKER

ABOUT US:

Hanlon Composites is a 60-year fiberglass manufacturer located in Euclid, Ohio. We make custom fiberglass products for industrial customers. www.HanlonComposites.com. We are searching for people with mold production capability. If you have experience with fiberglass, boat repair, mold construction and repair, we would like to speak with you. The compensation for this position starts at \$40,000 and tops at \$50,000 per year, paid hourly, depending on experience.

YOU SHOULD BE ABLE TO:

Construct prototype and production molds from foam patters
Repair defective fiberglass molds to conform with specific requirements
Assist in mold cleaning, maintenance and troubleshoot mold issues
Experience in reading of blue prints and drawings
Experience with vacuum forming and infusion is a plus but not required

REQUIREMENTS:

High school diploma required
5-10 years actual experience required
Must be able to communicate intelligently, and articulate thoughts and objections clearly
Must be able to work on multiple tasks, simultaneously, and be detailed and organized
Must be able to work without supervision
Flexible, willing to take on other duties as assigned or as needed

Other: This is a full-time position. There should also be the clear expectation that your timeliness and dependability is heavily relied on.

BENEFITS:

- Closed holidays
- Paid time off, Approved Leaves, Life Insurance, Dental, Short-term Disability, Long-term disability, Referral Bonus, and fun workplace and culture
- Plant hours are from 7:00am to 3:30pm

If you meet the above qualifications, send your resume and cover letter. We invite you to join *Team Hanlon!*
